

TUI

TUI

OUR BRILLIANTLY COLOURFUL 'BLACK' BIRD

- Tui appear black from a distance, but are brilliantly colourful in sunlight.
- They form pairs and can lay/incubate eggs twice in quick succession.
- Tui love nectar, preferring flax.

- At 27-32 cm they are not small birds, males tend to be larger.
- Like parrots, tui have beautiful and varied calls, they can replicate other sounds as well. They make two sounds at a time with their dual voicebox.

Print and Colour in a Tui below and attach it to your christmas tree.
